

Oilseeds Domestic Fundamentals:

- *Oilseeds cash markets remained unchanged in various market centers. NCDEX Soybean futures rebounded as the spot prices has not declined as sharp as futures. Mustard too gained handsomely.*
- *The area coverage under mustard, as on 30th November 2018, is reported up 12.69% at 57.89 lakh hectares compared to 55.51 lakh hectares at the same period last year. The area under groundnut is reported lower by 10.80% at 1.95 lakh hectares and that of sunflower is reported lower by 31.84% at 0.76 lakh hectares. The total sown area under rabi oilseeds, as on 30th November 2018, is higher compared to the previous year's level which is up by 10.21% at 63.14 lakh hectares compared to 62.90 lakh hectares during the corresponding period last year.*
- *NAFED auctioned 5540 tons of Mustard seed on 30th Nov in the price range of INR 3811 to INR 3939 per quintal. Stocks available as on date are at 5.08 Lakh tons.*
- *According sources, the Chinese government this week asked the Indian government for a draft of protocol for Indian soybean meal, to be discussed during the GACC visit to India starting December 10. A Chinese trade delegation is coming to India on Dec. 10 to inspect soymeal plants. Earlier China has cleared few soybean plants.*
- *According to the Ministry of Commerce/Export Inspection Council of India stated that China will resume import of Rapeseed Meal from India. Five units have already approved by General Administration of Customs of the People's Republic of China, GACC (formerly AQSIQ) and will able to resume the export of Rapeseed Meal to China once their registration with Chinese Ministry of Agriculture (MoA) is done which is cumbersome process and takes a long time.*
- *The daily soybean arrivals at this point of time is nearly 1 to 1.5 lakh bags less than the usual pace with the production of 100 lakh tons. However the sudden surge in arrivals before Diwali and then the fall in arrivals has overall compensated the cumulative arrivals figures and thus ND arrivals is y-o-y high.*
- *Cumulative arrivals according to govt sources is 30 lakh tons which is higher by 6 lakh tons y-o-y till Nov (MY starting in Oct).*
- *SEA has revised the Oct soymeal exports to 1.5 lakh tons as against .38 lakh tons in its provisional estimates which seemed unrealistic. In Nov SEA has given provisional estimate of 2.17 lakh tons of soymeal exports which is slightly higher y-o-y. In the ND months the exports has been higher y-o-y but still not enough to eat away the surpluses soon. India needs to at least exports 8-10 lakh tons of meal by Dec end or Mid Jan to tighten the Indian situation.*
- *India was able to export 55 thd tons of rapemeal in Nov improving m-o-m but lesser as compared to last year exports considered in the same month. Overall India's rapemeal exports has improved significantly as the prices offered remained very stable and remained well cheap as compared to Soymeal. India this year has able to gain the lost market thus rapeseed crushing season.*
- *Bangladesh a key buyer of soymeal from India has not taken any quantity of soymeal on Nov which is may be due to unavailability of railway rakes and /or aggressive buying of US soybean and crushing at overcapacity domestically, given the discounts US soybean enjoyed after the US-China fiasco.*
- *Bangladesh used to import 2-2.5 lakh tons of soymeal annually in the Oct –Sep period. Iran however took just 55 thd tons of soymeal out of 2 lakh tons the country booked for immediate delivery. Hopefully the remaining will be get exported in Dec month which may result in Dec exports clocking 3.5 lakh tons or even more. Thus in such situation we might able to dispose nearly 50% of the surpluses if the production of bean is at 104-105 lakh tons.*

Oilseeds International Fundamentals

- *Chicago soybean traded sideways in early trade as market lack fresh fundamentals.*
- *In the G20 Summit held in Buenos Aires, Argentina a lot of positives is coming out of it from US and China over easing tensions between Beijing and Washington. Trump has agreed upon leaving tariffs on \$200 billion worth of product at the 10% rate, and not raise it to 25% at this time from Jan 1. On the other hand China will agree to purchase a not yet agreed upon, but very substantial, amount of agricultural, energy, industrial, and other product from the United States to reduce the trade imbalance between our two countries. Further China agreed to start purchasing agricultural product from our farmers immediately. No additional tariffs will be imposed after January 1 and negotiations between the two sides will continue.*
- *Both parties agree that they will endeavor to have this transaction completed within the next 90 days. If at the end of this period of time, the parties are unable to reach an agreement, the 10% tariffs will be raised to 25%.*

- Outlook:** Soybean (plant delivery) prices are likely feature loss in coming days. The Indore (Plant Delivery) prices are expected to start trading in the range of 3350 to 3475 in coming days. Mustard (42%) spot prices are expected to remain in between 4150 and 4300 per quintal in coming days.
