

Wheat Domestic Fundamentals:

All India weekly average prices increased by 2.22 percent to Rs. 2126.53 per quintal during the week ended 08th September 2019. Wheat average price were ruling at Rs 2080.43 per quintal during 24-31 August 2019. As compared to prices in the week 01-08 September 2018, the prices are firm by 2.40 percent. Prices are expected to remain steady to firm in coming days due to hike in import duty and likely increase in demand in domestic market.

India mainly imports from Australia and Russia. Millers prefer Australian wheat over Russian/Ukrainian wheat due to better quality. As of now, Russian wheat with 12.5 percent protein content and Australian premium wheat (APW) is being quoted at \$338.80 (Rs 24291.96) per tonne and \$445.34 (Rs 31930.88) per tonne respectively, after including freight and import duty @40%. Local expenses will further add to cost. Whereas wheat mill quality price in Chennai is ruling around Rs 23000-23500 per tonne. Therefore, as of now, there is no parity for wheat imports.

Wheat production in Punjab has remained on higher side in past years. However this high production may have led to over exploitation of ground water. Of the total 138 blocks in Punjab around 109 have been marked as over exploited in terms of underground water and the remaining are in safe zone. The number of tube wells have increased from 2.8 lakhs to 14.5 lakhs since 1980s. The rigid cropping pattern of wheat-paddy has also aggravated the problem.

As per latest update, some of the mandis remained closed as they are protesting against government's decision to charge 2 percent TDS for withdrawal of more than Rs 1 crore. Mandis are likely to reopen from coming Thursday. Mandis in Delhi were closed due to their weekly off.

As per latest update, demand for loose and unbranded wheat has reduced as consumers in urban as well as semi-urban areas are shifting to packed and branded wheat. Furthermore, easier availability of packed wheat and increase in income are also playing a vital role. Around 70 percent of millers are small/medium wheat mills and rest are large wheat millers. Therefore, small/medium millers are facing heat due to fall in demand as they are already operating on thin margins.

Government has sold 336700 tonnes of wheat in OMSS until fourth tender in August'19. No rakes were sold. State government and bulk consumers bought 245850 tonnes and 90580 tonnes of wheat respectively. In the month of August'19 government has sold 152000 tonnes against offered quantity of 7819470 tonnes. Millers/traders have bought as much quantity as they could during arrival season due to higher reserve price. This was the main reason for lower sale through OMSS. Stock with millers/traders has diminished and sales through OMSS is likely to witness an increasing trend in upcoming weeks.

As per trade source, India has exported around 23.57 thousand tonnes in the month of July-2019. The quantity in July-2019 was exported at an average FOB of \$ 363.97 per tonne and the major destinations were Nepal, UAE, Sri Lanka and Bahrain. Exports are likely to be at lower side as other countries are able to provide quality wheat at competitive prices.

As per fourth advance estimate, India is likely to produce 102.19 MMT of wheat compared to 99.70 MMT in previous year. The total food grain production is expected at record 284.95 MMT compared to 285.01 MMT last year. Wheat prices are expected to remain steady to firm due to good demand in domestic market and no imports. Furthermore government has ample stock available to control any unexpected price surge.

As per trade sources, after increase in import duty to 40 percent imports have decreased substantially. India has imported no wheat in the month of July-19. Imports are expected to be low this year due to good domestic availability and increase in import duty. India has imported around 498.77 tonnes in the month of April-2019.

International Market Update:

Indonesian flour mills have bought two varieties (White and Red winter) of United States wheat. Flour millers bought 55000 tonnes. White wheat was purchased at \$255 per tonne Cost & Freight and red winter wheat was purchased at \$245 per tonne Cost & Freight. The said quantity will be delivered in October.

As per latest update, dry weather in Argentina has hit wheat crop amid expectations of bumper crop. Argentina is expecting to produce 21 MMT of wheat. If the current situation continues wheat crop production in Argentina may fall below expectations. Although ample availability in global market will ensure that there are no unexpected increase in prices.

As on 30th August Russia has harvested 61.00 million tonnes of wheat compared to 58.30 million tonnes a year ago for the same date. Around 18.50 million hectares of area has been harvested with an average yield of 3.29 tonnes per hectare compared to 17.50 million hectares with an average yield of 3.33 tonnes per hectare a year ago for same date. Russian wheat with 11.5% protein content is being quoted at FoB \$ 182.50 per tonne.

As per latest update, Ukraine wheat production is likely to increase by 13 percent in 2019 to 27.8 MMT compared to 24.6 MMT last year. Higher global production is keeping wheat prices under pressure. As of now Ukraine wheat with 11.5 percent protein content is hovering around FoB \$ 183.50 per tonne.

Outlook: Cash market is likely to trade steady to firm in the near term.
