

Pulses Domestic Fundamentals:

Today's Update:

- **New arrivals of Tur in Karnataka and Maharashtra are expected to increase from the third week of Dec.** The moisture level in the crop is high at 18 to 20% against the normal of 12 to 13%. Demand is stable and mills and stockists are waiting for Tur with lower moisture content. Continuous supply is there from African countries. Imported Tur in Mumbai is being traded at Rs 5,850- 5,950 per quintal. In Gulbarga market it is being traded at Rs. 6,000-6,100 per qtl.
- **Farmers have covered 3.22 lakh ha area under Urad this year so far, down by 8 % from last year till 3rd Dec 21.** Sowing of Rabi Urad in South India is yet to pick up. Normal Rabi Urad area is 9.07 lakh ha. As sowing has got delayed, it may limit acreage increase by 4 to 5% despite attractive prices prevailing in the market. Import flow too has been low amid tight supplies and quality loss in the Kharif season. Also demand is weak. So, prices may trade steady this week too and may improve slightly in the coming weeks.
- **Area under Chana may decrease this year despite a good recovery during last two weeks.** As of now farmers have covered 81.43 lakh ha against 80.01 lakh ha last year as on 3rd Dec-2021. Among major producing states like Rajasthan, M.P., Karnataka & Maharashtra area is down in M.P. by 1.95% to 20.02 lakh ha till now. Area is down in other states like A.P by 7.48 % and Chhattisgarh by 40.54 %. The pace of sowing may go down due to bad weather conditions and shifting of Chana and wheat area to Mustard in Rajasthan and Madhya Pradesh. Area coverage may end up with 106 to 108 lakh ha against 116 lakh ha last year.

Previous Updates

- **According to Ministry of Agriculture data, total pulses sown in Rabi 2021-22 stands at 113.98 lakh ha as on 03 Dec 21 against 113.48 lakh ha same period last year.** Overall sowing is up by 0.50 lakh ha till now. Gram has been sown on 81.43 lakh ha against last year's 80.01 lakh ha, up by 1.42 lakh ha. Lentil is planted on 13.03 lakh ha, Moong on 0.64 lakh ha, Urad on 3.22 lakh ha. Peas area stands at 7.92 lakh ha against last year's acreage of 8.05 lakh ha.
- **After the Centre revoked agricultural farm laws, traders doing business outside the Agricultural Market Produce Committee will be charged fee and development fee as before in Uttar Pradesh.** Those doing business outside the market of jaggery, pulses etc. will have to pay 1% mandi fee and 0.5% development fees on notified agricultural products. Notification regarding this has been issued.
- **The FSSAI has released an order regarding increasing in inspection fees for imported pulses.** In order F.No.12014/01/2020, they had increased the inspection fees for imported Pulses from Rs.7,900 per BL to Rs.15,570 per Sample. This increase in inspection fees will come into effect from 1st December 2021.
- **Overall Chana sowing is running smoothly and farmers may speed up sowing activities in all major states except south India** where continuous rains and the high moisture level in the field has hampered sowing activities. Sowing is expected to delay by 20 days, if rains continue, as predicted by the IMD. Farmers have covered over 70.01 lakh ha against 65.21 last year. Area is up in all major producing states including Madhya Pradesh, Maharashtra, Rajasthan and Karnataka. The next 15 days remain crucial from production point of view in South India.
- **Harvesting and arrivals of new Tur crop got delayed due to rainfall and cloudy weather from last few weeks at producing belt and forecast of rain for next week will affect quality of crop.** Tur crop is reportedly affected

in some districts of Karnataka. However Gulbarga, which is major Tur producing district, did not received rains but there crop is affected due to excessive fog condition. Quality loss too is possible in South India. The crop condition is good in other states barring some districts of Maharashtra, Karnataka and Andhra Pradesh. 20-25% losses are expected in Karnataka due to rains. Prices of Tur may move slightly up due to delayed arrivals to a certain extent in the near term.

- **According to Ministry of Agriculture data, total pulses sown in Rabi 2021-22 stands at 97.53 lakh ha as on 26th Nov 21 against 94.02 lakh ha same period last year.** Overall sowing is up by 3.52 lakh ha till now. Gram has been sown on 70.01 lakh ha against last year's 65.21 lakh ha, up by 4.80 lakh ha. Lentil is planted on 10.94 lakh ha, Moong on 0.45 lakh ha, Urad on 2.41 lakh ha. Peas area stands at 7.18 lakh ha against last year's acreage of 7.23 lakh ha.
- **The sowing of Masur has entered into last phase now and there is a fear in the market that the area may decrease from last year by 5-8%.** Despite, Favorable weather conditions area in Uttar Pradesh and Bihar is down by 11% & 22% respectively. Even in the West Bengal area is down by 4%. However, among major growing states like Madhya Pradesh area is up by 16% to 4.61 lakh ha. It may touch 5 lakh ha this year by 15th Dec-2021. As doubt regarding sowing still persists in Uttar Pradesh and Bihar as fields were underwater in both states at the beginning of the sowing. The next 15 days is very crucial from the sowing point of view.
- **Urad sowing in major Rabi growing states like Andhra Pradesh and Tamil Nadu got hampered due to excessive rains in South India for the last few weeks.** Continuous rains have raised concerns regarding sowing coverage this rabi season in South India. The major Urad growing districts in Andhra Pradesh are Krishana, Kurnool, Prakasham, Srikakulam, Guntur, Vizianagaram and Godavari. In these districts, there is water logging in many fields, so it would be very difficult to estimate losses until the weather gets clear. It may drive Urad prices up in the coming days.
- **Centre has extended the Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY-Phase V) for a period of another 4 months that is December 2021 till March 2022.** In this scheme Government gives 5 kg per person per month foodgrains free of cost to 68 crore families and 1 kg Gram to 19 crore families. So this would cap any uptrend in Chana cash market.
- **The selling pressure in Tur may get curbed and slight correction can be seen due to the demand coming out in the lower prices.** There is a possibility of delay in harvesting of new tur crop due to rains in the last 4-5 days in the growing areas of tur. Also, the tur dal procured through tender by the Tamil Nadu Civil Supplies Corporation has been approved. Retail and wholesale demand in pulses is expected to improve as the demand is expected to pick up on account of wedding season.
- **The condition of Tur crop is good so far in all major growing states especially in Maharashtra and Karnataka.** Some losses are reported from Andhra Pradesh and some districts of Karnataka due to non seasonal rains. The arrival from new crop started in Solapur and Bijapur region and may improve further in December. In other states crop is in flowering to pod filling states. With regular import and likely new arrivals may pressurize Tur cash market in coming weeks.
- **According to Ministry of Agriculture data, total pulses sown in Rabi 2021-22 stands at 76.12 lakh ha as on 19th Nov 21 against 76.19 lakh ha same period last year.** Overall sowing is down by 0.06 lakh ha till now. Gram has been sown on 53.68 lakh ha against last year's 52.15 lakh ha, up by 1.53 lakh ha. Lentil is planted on 8.84 lakh ha, Moong on 0.25 lakh ha, Urad on 1.34 lakh ha. Peas area stands at 6.67 lakh ha against last year's acreage of 6.53 lakh ha, up by 0.14 lakh ha till 19 Nov 21.

International Market Update:

- **The harvesting of pulses winter crop in Australia is running smoothly and is helping in meeting the strong demand in the global market despite the low availability of containers.** As per the latest updates by Pulses Australia, the prospect for export from Australia is very good because of low production in Canada this year. Indian buyers were reluctant to buy in volume from Canada in the beginning of Nov. as they were aware of the bumper Australian crop. The production estimates for the Australian pulses has been published. As per the latest estimates Australian would harvest 8.44 lakh MT Chickpeas in 2021-22 (Abares estimate) while Pulses Australia sees it at 8.70 lakh MT. The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.
- **As per the latest Abares estimate Lentils production in Australia pegged at 6.39 lakh MT in 2021-22. The Pulses Australia sees it at 7.10 lakh MT.** The 10 year's average production for Lentils is 4.24 lakh MT. Indian buyers may take interest in Australian Lentils. No deals has been struck so far. However, containers issue and higher freight would keep the import costing high in 2022 too. Major growing states like Queensland and northern NSW, containers availability is still low, and no path to bulk export exists because shipping slots are fully booked. This means scope for immediate export in bulk volume is limited. Prices have come down to a certain extent and growers may prefer to hold stock for better price.
- **The Field Peas production in Australia may decrease from 10 years average of 2.8 lakh MT to 2.5 lakh MT in 2021-22, as per the latest fig. published by Abares.** Australia Pulses sees it at 3.20 lakh MT. Export demand for the Australian Peas may increase as availability in Canada is down while prices are ruling higher. Malaysia & China would continue to import peas from Australia.
- **Agriculture and Agri Food Canada (AAFC) has finalised the production of lentils in Canada at 18.02 lakh tonnes for 2021-22 as per recent November reports.** Production is lowered by 10.66 lakh tonnes from last year's production of 28.68 lakh tonnes.
- **Field peas import in Spain increased by 268 % to 58127 MT in Sep-2021, as per the latest update by Eurostat data.** Spain had imported 15778 MT in Aug. Total import from Jan to Sep reached at 116257 MT against 132195 MT last year same time. Russia supplied 49970 MT in Sep, followed by Ukraine at 7591 MT.
- **As per the latest update by Statistics Canada, Green Peas export from Canada declined in Sep-2021 to 9890 MT against 17437 MT in Aug.** Canada has exported total 27327 MT during the marketing year. It is down by 29% from last year till Sep. The UAE was the biggest importer, buying 3,573 MT, followed by Colombia, taking 2,184 MT and Philippines at 865 MT.
- **So far during this marketing year added to a weaker trend, with green pea export shipments from Canada were well down, plunging relative to the previous month in September, judging from available statistics from Statistics Canada.** Export sales during the month totaled 9,890 metric tons (MT), down from 17,437 MT the previous month. This boosted shipments so far during the marketing year to 27,327, down 29% last year. United Arab Emirates was the biggest consumer, buying 3,573 MT. Colombia was the second most important importer taking 2,184 MT, followed by Philippines at 865 MT.
- **The IGC is going to include Lentils, Chickpeas and Dry beans in the Council's definition of grains under Article 2(1) (e) of the grains Trade Convention.** This means that now the IGC secretaria will expand its market information for Pulses. Actually, pulses trades are continuously increasing throughout the world and has expanded with good pace and reached at 16 to 17 million MT in last 5 years. Right now the IGC is providing updates on Pulses trade and production estimates in the Grain Market Report on a bimonthly basis. Apart from

it S&D balances are published for major exporters for Pulses like Lentils, Dry Peas and Chickpeas. Now FoB prices matrix too would be included.

Daily Outlook: - Pulses are likely to trade mixed.
