

## Pulses Domestic Fundamentals:

### Today's Update:

- **Indian Pulses traders/importers may avoid business with Russia amid increased tension between Ukraine and Russia. If conflict starts, severe sanctions on Russia may be imposed and it may affect business of Indian importers directly. Right now dependency on Russian commodities is not high for India. Russia supplies Pulses, Wheat, Barley in bulk volume to the world community.**
- **Chana market traded unchanged at previous level in most market, except Delhi where it traded down by 25-50 per qtl to 5150-5175. Demand is weak. New Chana arrivals in some pockets of Maharashtra and MP were reported 5 to 10 bags. Moisture content in the new crop is high. Arrival from major growing region is likely to increase from mid-Feb. Sentiments remain weak.**
- **Tur cash markets could not sustain its firm momentum and may decrease by 100-150 more from the current level. Arrival pace is yet to pick up while demand from the bulk consumers like mills/stockists remains restricted. Pressure on price might be seen in coming days despite the low volume of import till mid-Jan. Market is aware of the fact that volume of import may increase as the production in Myanmar was reported at 2.5 lakh MT. Import from Mozambique, Tanzania and Malawi continues at the cheaper price. All these factors have limited the scope for uptrend in the short term. The medium-term outlook seems good. Stake holders should start buying after a correction of 150-200. Nafed is active in states of Maharashtra, Karnataka and have planned to procure in other states too and its procurement drive would not allow market to decrease beyond a certain level. Tur in Gulbarga market is being traded at 6000-6600, depending on quality of the crop.**
- **Urad cash market traded almost steady in various markets as the poor offtake from mills limited the scope for upward momentum. Apart from it, good import volume is expected from Myanmar this year and it would ease supply side in the domestic market despite low production prospects in Rabi season in south India. Urad FAQ and SQ traded at 6250 and 6725 in Chennai market while it traded at 6400 in Mumbai market. New crop was traded at 6500. Agriwatch expects range bound movement in cash market until and unless weather turns rough. Factors like weather conditions, the import flow, quotes in Myanmar and the demand side would be a major price driver for the Urad market. Under the prevailing condition sideways movement is expected.**

### Previous Update:

- **All India Rabi pulses area was up marginally by 0.90 % to 164.34 lakh ha as on 21<sup>st</sup> Jan-2022 as good recovery was seen during the last few weeks for Masur & Chana. Farmers have covered 113.30 lakh ha under Chana so far, up by 3.90 % from same time last year. Lentil area continues to recover and currently stands 3.24 % higher than same time previous year at 17.32 against 16.87 lakh ha. Urad acreage has also recovered during the week and stood at 7.22 lakh ha, which is still lower by 7.34 % compared to 7.80 lakh ha same time previous year. Until 14<sup>th</sup> Jan, the rabi Urad acreage was lagging that of previous year by 7.38 %. Moong acreage continues to lag the previous year's tally by 20.84 % to 4.67 lakh ha. Field pea acreage was down by 2.17 % from previous year, at 10.10 lakh ha. This is also an improvement from previous week's lag of 3.50 %. Overall acreages for Urad and Field Pea are likely to remain lower than previous year as sowing may continue only for 10-15 more days from now. Rabi Moong acreage is likely to recover to some extent as the sowing duration is longer and may continue till end of Jan-2022. By the end of Feb, summer sowing for Moong will start. Despite this, overall acreage of Moong may also remain lower than the previous year as the current lag is too large.**

- **Govt. would procure Chana & Masur at 5230 and 5500 per qtl. From Rabi crop 2022-23. The CACP has already recommended to fix Rabi MSP and now the govt. has accepted it. Govt may face challenges** to procure Masur this year as prices are ruling 1600-1700 above MSP in the market. Masur and Chana area has increased this year and good production size is expected under the normal weather condition. Weather conditions in Jan, Feb and Mar are crucial. Masur may continue to trade firm as the new crop is one and a half month away from now while the shipment pace is rather slow despite good availability around 1.95 lakh MT (including new and old) at various Indian ports. Masur in Mumbai and Kanpur markets is being traded at 7250 and 7700. It may move up further.
- **Moong cash market traded stable despite the low Rabi area coverage so far. Farmers have covered 3.23 lakh ha, down by 38.59 % from the last year same time.** Market is expecting higher area coverage in the summer season, starting from 1<sup>st</sup> Feb-2022 and it may make up loss seen in the Rabi season to a great extent. Demand in cash market is weak while millers are purchasing Kharif Moong crop of inferior quality and fulfilling their immediate needs. Around 60% kharif Moong quality is poor this year and it is restricting prices to improve. Apart from it, import volume is higher this year and it may continue from Myanmar as the crop size in Myanmar is said to be good this year and the import would continue till June-2022. Around 1.46 lakh MT Moong has already been imported during Apr to Dec-2021 period. Around 15000 MT is expected to be imported in Jan, Feb and March against 81,000 MT last year. Demand is likely to improve from mid-Feb when new arrivals expected to start in south India. So, spike in the market is unlikely. Nafed too has stock. Moong may continue to trade in the range of 5500-6500 in Jan-2022. Myanmar is offering Moong at \$790 per MT on Indian port basis.
- **Increasing area coverage, weak demand from mills and ample availability of old stock with Nafed would not allow Chana market to move up beyond 5300-5400 in Delhi market.** Stockists too have stock and they can't hold it till Feb and may start releasing stock by mid Feb. Under the normal weather condition production may cross 105 lakh MT, up by 8 lakh MT from last year. With Over 18 lakh MT carry in and higher production size, Chana would continue to trade range bound in Jan and Feb-2022. Besides, govt. would not allow market to go up until states election is over. So Chana would continue to trade in the range of 4800-5400, depending on quality in the near term. Weather would remain crucial in Jan and Feb for the standing crop of Chana. Under normal condition price would move range bound.
- **Nafed may procure around 8 lakh MT Tur this year.** Out of total 2.71 lakh MT would be procured in Maharashtra while 2.5 lakh MT in Karnataka. The rest would be procured in other states. Preparation for the procurement drive is on and it would start in Jan-2022, when arrivals start increasing. Right now prices of Tur in various markets are ruling below MSP.

#### **International Market Update:**

- **Pulses exporter communities of Myanmar have urged the Indian Government to increase annual import quota for Tur and Urad by 100%.** Notably, Government of India had signed a memorandum of understanding with Myanmar to import 2.5 lakh MT urad and 1 lakh MT Tur on annual basis for 5 years FY 2026 through private channel. Now they have requested the volume to be doubled. The request regarding the doubling the annual quota has been communicated to Nidhi Khare, Additional Secretary, Department of Consumer Affairs. The Myanmar exporter's association fears that if the quotas are not increased to 500,000 tonnes for urad and

200,000 tonnes for tur by the Government of India, farmers may switch to other crops, that may lead to rise in prices of both the commodities in the local market.

- Speaking on the Myanmar/India Urad status in the OATA Myanmar Panel Discussion, Mr. Hitesh Jain, Country Head, AGT Foods & INGREDIENTS INC.,** hinted towards ample availability this year in Myanmar, based on higher production estimate there. According to Mr. Jain production of Urad has been on the rise in Myanmar from 2019-20 and continued to increase till 2022. It increased to 6.3 lakh MT in 2020-21 from 5.5 lakh MT in 2019-20. This year it may increase to 6.8 lakh MT. Urad production in India is likely to decline 23.4 lakh MT in 2020-21 to 20.5 lakh MT in 2021-22. So, India would remain a major buyer for Urad from Myanmar, taking advantage of G to G deal for 2.5 lakh MT import annually for the next 5 years. It may increase supply in India as the production prospect seems very good. Arrivals from the new crop is expected soon. As Production size in India is low this year, prices are unlikely to decline much from the current level. If Rabi crop in India suffers much due to weather aberration, prices of Urad may increase in the domestic market. Total global availability might be at 2019-20 level of 27.3 lakh MT in 2022.
- The OATA Myanmar Panel Discussion on Tur and Urad gave some useful information regarding production, demand and price outlook for both the commodities on 07th Jan-2022.** As per Anant Chhajed, General Manager, Swiss Singapore overseas P(LTD), Myanmar, Tur opening stock continued to decline from 80,000 MT in 2020 to 70,000 MT in 2021. It declined further to 10,000 MT in 2022 in Myanmar. According to Anant Chhajed Production in Myanmar is expected to increase more than double to 2.5 lakh MT in 2022 from 1.1 lakh MT in 2021. Tur production in Myanmar in 2020 was registered at 1.75 lakh MT. At export front Myanmar had exported 1.85 lakh MT tur in 2020. It decreased to 1.70 lakh MT in 2021. However this year export may increase to 2 lakh MT. At carryout stock front the season 2021 ended with 10,000 MT. It shows that supply side would remain tight in Myanmar this year too as India would remain a big buyer in 2022 too. Its impact on Indian Tur Price would be felt soon. Indian crop size too is below expectation if we see the latest new arrival pace in Karnataka & Maharashtra.
- As per the latest data released by Australian Bureau of Statistics, Australia has exported 43,902 MT Lentils in Nov-2021, down by 11.02% from Oct, when 49,341 MT was exported.** Australia had exported 34,200 MT in Nov-2020. The major buyers were Bangladesh, Sri Lanka & India buying 15,720, 8,573 and 6,674 MT respectively. Notably, Australia has harvested a bumper crop this year.
- As per the latest release by the Canadian Grain Commission lentil export from Canada has decreased drastically to 49,00 MT only in Nov-2021 under licenced facility.** Notably, Canada had exported 1,14,100 MT in Oct, while in Nov-2020 it had exported 64,200 MT. Container and labour issues amid the higher global price and buyers unwillingness to buy at higher cost restricted the volume to a great extent. Canada has exported total 3,23,400 MT in the ongoing MY against 4,78,000 MT last year same time. It is 32 % lower than what was exported same time in 2020-21.
- Turkey Government extends zero import duty on Lentils through out the year to control the spiraling prices of dal and food inflation.** It is an unexpected move for the global market. Notably, Turkey imposes import duty on grains/food items ranging 19.3 to 130%, depending on the supply demand side of a commodity. If there is no extension on 1st Jan-2023, it would be come to formal level.
- Agriculture Canada has revised down Field Pea production estimate by 10.65% to 22.58 lakh MT for 2021-22 in Dec against Nov-2021.** It was 25.27 lakh MT in Nov-2021. If we compare last year's production, it is down by 50.85%. Pea production in Canada in MY 2020-21 was 45.94 lakh MT. This means the availability of pea in

2022 would be 50 % low and it would keep the price up at the current level. Prices of Peas would continue to rule near \$580-600 throughout 2022. As import is not taking place for India due to restrictions, the price may be stable at the current level. As production has decreased, export volume from Canada too would decline by 8% to 21 lakh MT from Nov estimate and 41.34% from the actual of last year. If the Indian govt. allows import(unlikely), prices of other pulses, especially Chana may decrease further. Consumers in India have already moved to Chana as availability in the domestic market is higher and it is cheaper.

- As per the latest update released by Agriculture & Agri Food Canada Production estimate of Lentil for 2021-22 has been revised down by 10.88% to 16.06 lakh MT from Nov estimate of 18.02.** If we consider it from 2020-21 production, it is down by 44 %.Canada had produced 28.68 lakh MT last year. Total supply has come down by 9.24 % due to this latest revision. It has decreased to 20.72 from 22.83 lakh MT in Nov-2021.If we compare it from last year total supply has decreased by 35.04 %,when total supply was 31.90 lakh MT.At export front too availability has decreased by 10.52 % to 17 lakh MT, it was 19 lakh MT in Nov while 23.46 lakh MT in 2020-21.It hints that prices of Canadian Masur may move up again, if Australian suppliers restrict their sale at the current prevailing prices, sensing the decreasing availability in the global market throughout the first half of 2022.
- The harvesting of pulses winter crop in Australia is running smoothly and is helping in meeting the strong demand in the global market despite the low availability of containers.** As per the latest updates by Pulses Australia, the prospect for export from Australia is very good because of low production in Canada this year. The production estimates for the Australian pulses has been published. As per the latest estimates Australian would harvest 8.44 lakh MT Chickpeas in 2021-22 (Abares estimate) while Pulses Australia sees it at 8.70 lakh MT. The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.
