

RED CHILLI

Fundamentals:

Today's Update:

- Continued steady sentiment witnessed in Red Chilli market on Friday.
- Current year Chilli sowing likely to start from July first or second week in major growing regions like AP, Telangana etc. We expect sowing area likely to go up by 30 – 40% as per current situation as farmers are receiving higher prices compared to last year.
- Current year, total value of Chilli seed for sowing is around Rs.10 crore compared to last year Rs.6 crore as farmers are more interested for chilli sowing.
- Buyers may inactive at higher prices due to overflow of chilli cold storage stocks in AP, Telangana, Karnataka and exporters demand are slow in the spot market due to increased shipping costs.

Previous Update:

- Due to coronavirus lockdown and shortage of labour Chilli export quantities are pending for delivery to countries like China, Bangladesh, Sri Lanka etc. Now aftermarket reopens trading is happening in the normal way which will support the prices going up.
- As per trade sources, as of now around 65 – 68 lakh bags (1 bag = 40 kgs) new chilli stored at Guntur cold storage of total capacity 70 lakh bags. AP total around 85 – 90 lakh bags stored as of now.
- Chilli traders are hopeful for prices going up Though current year India's Red Chilli production went up by 12% as per Agriwatch estimates from the previous year, but due to unseasonal rainfall during maturity stage quality reported damaged and supported the prices.
- Agriwatch estimates, Red Chilli all India production for 2021-22 is estimated at 13.84 lakh MT. Last year's production was 12.32 lakh MT.

CARDAMOM

Fundamentals

Today's Update:

- Steady sentiment witnessed in Delhi Cardamom spot market on Friday.
- Subdued demand in the upcountry markets has hit the sales and liquidity for buying in the consuming centers of Delhi, Rajasthan, Madhya Pradesh, Uttar Pradesh etc. in the second wave of Covid.
- India's production for the coming marketing year 2021-22 (which will start from August officially) expected better around 30,000 MT also put the cap on prices.

Previous Update:

- Currently, Spice Board has been suspended Cardamom e-auctions in Idukki, Kerala and Bodinayakkanur in Tamil Nadu due to Covid-19. Around 95 per cent of the planters are depending on auctions to get a fair price for their produce.
- As per trade information, private sales are happening through farm gate level, but it is not helping the traders to receive the desired grades and quantity.
- Cardamom planters were received higher prices last two years, therefore, they are taking care of their plants and favourable weather condition, is the main reason for expecting good crop in the coming year.
- As we expected earlier, the new Cardamom supply pressurizes the prices from higher levels due to increased production.
- Agriwatch estimates for 2020-21, India's Cardamom production would be around 22,000 – 23,000 MT, due to favourable weather conditions. Last year it was 19,000 – 20,000 MT.
