

RED CHILLI

Fundamentals:

Today's Update:

- Steady to firm sentiment was witnessed in Red Chilli spot market on Thursday.
- Lower cold storage supply as stockists were holding their stocks supported the prices today. Good demand reported for cold storage stocks as buyers were fearing quality damage for new chilli crop which likely to start from January at Guntur market.
- Due to unseasonal rainfall in Chilli growing regions and some crop damage report prices reported up.

Previous Update:

- *As per Agriwatch estimates, Red Chilli all India production for 2022 is estimated at 14.66 lakh MT, revised after rainfall in Karnataka and virus affected in AP and Telangana , earlier estimates it was 15.93 lakh MT. Last year's production was 13.84 lakh MT.*
- *Due to heavy rainfall in Karnataka chilli growing regions likely to impact chilli standing crop. As per initial report, chilli crop may damage by 8 to 10% as per current situations. Farmers are fearful regarding chilli quality also. Next 10 -15 days is crucial.*
- At Bedia (Madhya Pradesh) market, chilli prices reported up due to good demand. Buyers are interested only for good quality. Farmers are waiting for higher prices for releasing their produce.

TURMERIC

Fundamentals:

Today's Update:

- Steady to firm sentiment was witnessed in Turmeric spot markets on Thursday.
- Due to unseasonal rainfall in Turmeric growing regions supported the prices. Buyers were active for old stocks in the spot market.
- In Maharashtra, Basmat and Hingoli Turmeric growing regions some crop damage report came due to water logging in the field as a result of continuous rainfall, however damage percentage till now not clear.

Previous Update:

- *Turmeric standing crop quality is reported well as of now. However, continuous rainfall and cloudy weather in growing regions in AP and Telangana may concern for Turmeric crop. As of now, no crop damage reported.*
- Agriwatch first advance estimates, Turmeric all India production for 2022 is estimated at 4.89 lakh MT. Last year's production was 4.46 lakh MT, up by 9.64% from last year.

BLACK PEPPER

Fundamentals:

Today's Update:

- Steady to weak sentiment witnessed in Black pepper spot market reported on Thursday.
- Vietnam Pepper prices today (December 9) simultaneously moved sideways in key localities. Currently, the highest price recorded is 85,000 VND/kg. According to the survey, pepper prices today were stable in key provinces in the country. The lowest price is 83,000 VND/kg available in Gia Lai province. Slightly higher is Dong Nai province with 83,500 VND/kg. Currently, the two provinces of Dak Lak and Dak Nong continue to trade at the same level of 84,000 VND/kg. Similarly, the two provinces of Binh Phuoc and Ba Ria - Vung Tau, respectively, have stable purchases at 84,500 VND/kg and 85,000 VND/kg, respectively.
- According to statistics from the Malaysian Bureau of Statistics, in the first nine months of 2021, Malaysia pepper exports up 17.9% over the same period last year. In the domestic market of Malaysia, the Malaysian Pepper Board (MPB) is currently focusing on efforts to improve the quality of pepper at the farm level through the selection of varieties grown for high production of white and black pepper. grade with export quality. This factor has helped Malaysia become a major competitor with other pepper producing countries in the world such as Vietnam, Indonesia and India.
- Malaysia is currently one of the largest pepper producers and exporters in the world. With the help and encouragement from the Government, the country is expected to be in a better position as the world's leading pepper producer in the future.

Previous Update:

- According to the Department of Agricultural Product Processing and Market Development Vietnam, the export price of pepper has increased sharply, leading to a continuous increase in pepper prices in the domestic market. At the beginning of the year, the price of raw pepper was only at 50,000 VND/kg by mid-October, it surpassed the 90,000 VND/kg mark and is expected to increase by over 100,000 VND/kg by the end of the year.
- According to local sources, farmers in the Dong Nai province have begun to harvest pepper. The selling price at the garden is about 80,500 - 90,000 VND/kg, more than doubled compared to the region last year. The early harvest of this local pepper is a great advantage. Pepper farmers in the province make good profits. In early 2021, with more than 12,000 hectares, pepper is a crop that consumes a large area in Dong Nai, so it can be said that pepper is still the main crop of the province.
- Continuous supply in the spot market put cap on prices from higher levels.
- Lower production expectations supported the domestic pepper prices. As per current situations, Agriwatch expected India's pepper productions for 2021-22 likely to go down by 8 to 10% compared to last year. Last year (2020-21) India's Pepper production was 62,000 MT.
- Agriwatch expects, black pepper prices likely to go up further around Rs.70,000 – 75,000/-qtl, as other producing countries new crop arrivals likely to start from March in Vietnam and expected lower production. So, domestic as well as international buyers are looking for Indian variety.
- Vietnam pepper export from January to October 2021, was reported around 229,736 tons, compared to the same period in 2020, the export volume decreased by 5%. Progressively from January to October 2021, Vietnam imported 21,977 tons, of which black pepper reached 16,322 tons, white pepper reached 5,655 tons, compared to the same period in 2020, the import volume decreased by 29.1%.
- Due to lower supply from other producing countries in the global market, demand shifted to Indian market supported the domestic prices despite of higher production (2020-21).
- Fresh domestic demand in the spot market as winter season is approaching supported the prices.
- Vietnam Pepper prices is expected to increase continue till the last months of the year because the pepper production of Vietnam as well as some major pepper producing countries such as Brazil and Indonesia are affected by climate change, so the annual output is expected to decrease continually.

JEERA (CUMIN SEED)

Fundamentals:
Today's Update:

- Mixed sentiment witnessed in Jeera Unjha spot market on Thursday.
- Lower supply supported the prices in the spot market. Farmers and stockists are only interested to releasing their produce at higher prices level.

Previous Update

- According to Gujarat Agri. Dept, as on 06th December, 237,866 hectares as compared to last year same period 381,055 hectares.
- Current year, Jeera sowing started in Rajasthan and Gujarat growing regions, as of now 56 to 60% sowing completed. Market participants are expecting lower sowing area as jeera prices are lower compared to other competitive crop like Coriander, Ajwain, Fennel etc.
- Spices Board, vide circular cited under referece 02 had notified about the forthcoming requirement of cleared pesticide test report issued by the competent authority for export of Cumin consignments from India to China. Further, in line with the requirements put in place by the General Administration of Customs, People's Republic of China {GACC}, it has been decided to include testing of pesticide residues in Cumin seeds under the mandatory regime of the Board, for export to China. Therefore, with effect from 13th December, 2021 exports of Cumin seeds to China will be permitted only with the Cleared analytical Report from Spices Board.
(For details - <http://www.indianspices.com/trade/trade-notifications/notificationdetails.html?id=272>)
- As festive demand started buyers reported active from lower prices level.
- As per the Agriwatch production estimate, Jeera production for 2021-22 (marketing period) is estimated at 391,801 MT (around 71 lakh bags each of 55 kg) compared to last year's 451,451 MT (82 lakh bags).

CARDAMOM

Fundamentals
Today's Update:

- Mixed sentiment witnessed in Cardamom spot market on Thursday.
- Fourth round picking activity started from December first week.

Previous Update:

- Due to recent flood in Kerala growing regions like Idukki affected the Cardamom plants. As per trade sources, around 10% crop loss reported till now.
- India's production for the coming marketing year 2021-22 (already started from August) expected better around 27,000 MT also put the cap on prices. Last year it was 23,000 MT.
- Cardamom planters were received higher prices last two years, therefore, they are taking care of their plants and favourable weather condition, is the main reason for expecting good crop in the coming year.
- As we expected earlier, the new Cardamom supply pressurizes the prices from higher levels due to increased production.

CORIANDER SEED

Fundamentals:
Today's Update:

- By and large steady sentiment witnessed in Coriander spot market on Thursday.

Previous Update:

- Current year, Coriander sowing continued started in Rajasthan, MP and Gujarat growing regions, as of now 80 to 85% sowing completed.
- According to Gujarat Agri. Dept, as on 06th December, 108,923 hectares as compared to last year same period 115,969 hectares.
- As per Agriwatch initial sowing report, in MP Neemuch and Mandsour growing regions farmers are shifting Coriander crop to Ajwain and Garlic due to better price realisation, however actual scenario likely to come after 15 to 20 days.
- As we expected buyers are active from lower prices level as festival season started.
- Farmers want to release their produce at higher prices only.
- *Agriwatch estimates lower ending stocks for 2021-22 (marketing year) likely to support Coriander prices in the coming days.*
- As per Agriwatch production estimate, Coriander production for 2021-22 (marketing year) is estimated at 342,435 MT (85 lakh bags) compared to last year's 352,316 MT (88 lakh bags, 1 bag = 40 kg).
