## BLACK PEPPER

### **Fundamentals:**

#### **Today's Update:**

- Steady to firm sentiment was witnessed in Black pepper spot market on Saturday.
- As AgriWatch expected earlier, buyers were active from lower price levels as India's pepper production is estimated to be lower.
- Lower production expectations supported the domestic pepper prices. As per current situations, AgriWatch expected India's pepper productions for 2021-22 likely to go down by 8 to 10% compared to last year. Last year (2020-21) India's Pepper production was 62,000 MT.
- Vietnam Pepper prices as on 2<sup>nd</sup> April remained unchanged in key provinces in the country. Currently, the domestic price of pepper is fluctuating in the range of 77,500 - 80,000 VND/kg. Currently, the two provinces of Dong Nai and Gia Lai together purchase at the same level of 77,500 VND/kg. Next are the two provinces of Dak Lak and Dak Nong with the same price of 78,500 VND/kg. Similarly, pepper prices today in two provinces of Binh Phuoc and Ba Ria - Vung Tau were stable at 79,000 VND/kg and 80,000 VND/kg respectively.

#### **Previous Update:**

- The global pepper market in early 2022 had a relatively slow start. Specifically, Vietnam's export volume in two months was equivalent to the same period last year. Meanwhile, the export volume of other major pepper producing countries decreased: Brazil decreased by 20.4%, Indonesia decreased by 48.3% and India decreased by 29.6%.
- According to data from the Brazilian State Centre for Foreign Trade Statistics, Brazil's pepper exports in the first two months of this year fell sharply by 20.4% in volume over the same period last year, reached 13,401 tons. In which, Brazil's pepper exports to main markets such as Germany, UAE, USA, Egypt all decreased.
- However, Vietnam and India suddenly boosted their purchases of pepper from Brazil with the volume of 3,370 tons and 1,440 tons, respectively, increasing strongly by 75.1% and 178% over the same period. These are also the two countries that import the most pepper from Brazil in the first two months of this year.
- According to statistics from the Russian Customs Service, the country's pepper imports in 2021 reached 9.27 thousand tons, down 6.1% in volume, compared to 2020. Russian Customs Service shows that the country's pepper imports in January 2022 reached 470 tons, down 20.2% in volume, compared to January 2021; compared with January 2020 decreased by 27% in volume.
- Continuous supply in the Kochi spot market put a cap on prices from higher levels.
- However, we expect Indian stockists and planters may hold their stocks if prices reported correction further as pepper production was expected to be lower current year.
- Vietnam pepper production is expected to continue low due to the impact of climate change and objective causes such as fertilizer prices, drug prices, and rising labour costs. It is forecasted that in 2022, Vietnam's pepper output will decrease compared to 2021, which will cause pepper prices to increase in the near future. Vietnam's pepper output around 220,000 tonnes in 2021 and as per initial report for 2022 production would be around 180,000 tonnes.
- As we expected earlier, Indian stockists and planters are holding their stocks on expectations of higher prices in coming days as pepper production expected lower current year.
- Currently black pepper import reported lower from Sri Lanka and Vietnam supporting the Indian domestic prices. New pepper supply continuing at Kochi spot market.
